●因為本圖是基本線路圖，為改進性能，各元件的數值將有變動。
●上述所有直流電壓值由測試機(內組100kΩ/V)測得。

● Since this is a basic circuit diagram, the value of the parts is
subject to be altered for improvement.

● All DC voltage to be measured with a tester (100kΩ/V).
Voltage taken on a complex color bar signal including a
